Carnegie Mellon University, School of Computer Science – Pittsburgh, PA

B.S. in Computer Science, Expected May 2030
Relevant Coursework: 15-122 Principles of Imperative Computation, 15-151 Mathematical Foundations for Computer Science, 21-241 Matrices and Linear Transformations

Selected Honors

- USA Mathematical Olympiad (USAMO) Qualifier – perfect 450/450 qualifying index (2026)
- U.S. Presidential Scholar in the Arts – Selected as 1 of 20 nationwide (2026)
- New York Times "Growing Up in the Age of AI" Student Challenge: Runner-Up – top 2.5% of 2,500+ submissions (2026)

Product & Technical Experience

ActionPlan / Unjargon.AI – Founder & Developer (2024 – Present)
- Built and launched Unjargon.AI, a full-stack AI product on AWS for simplifying complex legal, medical, government, and education documents; reached 1,000+ users during beta and was recognized by *The New York Times*.
- Conducted user research showing that users still lacked clear next steps after understanding complex documents, prompting the pivot from Unjargon.AI to ActionPlan.
- Built ActionPlan, a workspace that turns documents and emails into next steps, deadlines, risks, and questions to ask, with reliability systems including document classification, date extraction, readability scoring, and structured AI outputs.

ScottyLabs Foundry – Builder Cohort Member (2026 – Present)
- Develop ActionPlan through weekly customer discovery, product experimentation, and iteration, using user feedback to refine product direction and prioritize features.

ScottyLabs Labrador – Committee Member (2026 – Present)
- Co-developing Block Party, a campus dining product that tracks meal block usage and predicts end-of-semester surplus.
- Collaborate on product ideation, feature scoping, and early development with engineering and design teammates.

InDevelopme – Backend Intern, TrueSoul Media Nonprofit Project (2024 – 2025)
- Built backend infrastructure and APIs for a 501(c)(3) nonprofit partnership using AWS and GitHub, while developing technical onboarding materials for new contributors.

AI Music Research – Independent Researcher (2024 – 2025)
- Researched emotion-conditioned music generation using Python, NLP sentiment analysis, and symbolic music models under guidance from a music informatics professor.

Camplor, College Research Tool — Founder & Developer (2026 – Present)
- Built a college research platform with Next.js and Supabase featuring AI-generated school profiles, authentication, saved schools, and persistent personalized user data.

Leadership & Community

HackCMU (ACM@CMU) – Organizer, Mentor & Judge (2026)
- Helped run HackCMU across registration, logistics, announcements, venue setup, and participant operations.
- Mentored participant teams, providing technical and product feedback on implementation and presentation decisions.
- Judged hackathon projects, evaluating technical execution, creativity, and product design.

CodeCrew – Mentor & Judge (2023 – 2025)
- Mentored K-12 students in programming, debugging, and hackathon project development; coached a winning team in 2024 and judged K-12 hackathon projects in 2025.

Viola Content Creation – Content Creator (2025 – Present)
- Grew a viola performance platform to 5K+ followers & 1M+ views; transcribed pop/classical music into accessible sheet music.

Skills: Python, JavaScript, TypeScript, React, Next.js, Node.js, Tailwind CSS, Git, Vercel, REST APIs, LLM APIs
